Description

The group theme functionality no longer works in 5.x and 6.0.

To test:

- Set "each group can have its own theme" in Admin>Look&Feel>theme
- Admin>Groups, edit a group and try to set the default theme for a group.
- nothing happens.

- theme control - still working.
- user preferences - theme - still working.

Solution

Thanks Michael, I fixed this for Tiki 6 in r30162 and r30163. There were 2 issues:

From the beginning, a group needed to have a group home set to be able to properly remember a group theme setting.

From Tiki 5, the group theme (even if previously set) did not affect the theme. This will be fixed for Tiki 5.4.
