Description

Topic says it:

- newly created user
- send message -> doesn't work, error message
- go to MyPreferences
- don't change anything
- just hit "Change Preferences"
- go send a message -> works

Solution

Dunno - but make it right!
And while you're on it, make it optional!

Just saw, that a newly created user didn't have it checked by default - RECHECK!

I have corrected this problem in tiki-register.php
