Rating

★★★★★ (0) ?

Description

Just pretty inconsistent behavior depending on the browser. Images get converted to HTML images, sometimes the tiki_plugin div disappears etc.....

Solution

Workaround for now is to tell users to cut and paste wiki-plugins and images using the Source tab.

I made a copy-paste using Chrome in trunk r65146 and did not notice anything wrong. Please mention one affected browser and provide the original source of at least one affected page.
