Description

When hovering over an item, there opens a tooltip. This tooltip got a titlebar that reads the time and some title. For changes in the Wiki it reads e.g. "17:43 - Wiki". But for Blogs it reads "17:43 - Name of the blog". Perhaps better would be "17:43 - Name of the blog Blog" or "17:43 - Blog: Name of the Blog".

This is especially interesting for Forums, because the "o" as an icon for forums doesn't tell most people anything.

Solution

Partially solved in 1.10 (see tiki-action_calendar.php)

As per Tiki23 in a calendar event in a date cell display a time and the event title. Hovering over it show a tooltip with the title and the description.

Isn't it what is expected? Please add details and information if not. If issue is solved please close
