Description
I added a jscalendar field to a new tracker. On the item entry page, the calendar is drawn underneath the form.

Solution
Fixed in r30937 on branch 6.x by increasing .calendar z-index. The fix should ship in 6.1.

I fixed the same problem in r29714 setting the z-index to 6, but you have a z-index of 200 in .tabcontent in Coelesce.
