Description

Hi,

I'm testing tiki 6.0. I found that there is a problem to edit submitted articles with image uploaded in section "own image". After saving an article appears page:

406 Not Acceptable

.../tiki-edit_article.php with info:

"Not Acceptable

An appropriate representation of the requested resource /enigme/tiki-edit_article.php could not be found on this server.

Additionally, a 404 Not Found error was encountered while trying to use an ErrorDocument to handle the request."

It happens during second editing. The error does not appear if there is no image uploaded or if the image is uploaded by WYSIWYG. In result of this, it's impossible to reedit some articles.

The second problem is adding new article with option submit article. When I user tries to apply a template the site doesn't refresh.

Best regards,
Tomek
