Description
At the end of install in

URL:
http://<domain>/tiki-install.php?nolockenter&install_type=update

The crash ends with :
(xdebug track begins)

Zend_Session_Exception: session has already been started by session.auto-start or session_start() - on a try catch no problem
Notice: Undefined index: min_pass_length in D:\Trebly\teawik-ld8-7xSa\lib\tikilib.php on line 1612
Notice: Undefined index: pass_chr_special in D:\Trebly\teawik-ld8-7xSa\lib\tikilib.php on line 1614

(xdebug track ends).

Remark out of subject :

Into my notes and refs dates are often in not common format yymmdd with B1=2011 date=B10117 is 01/17/2011, B2 is 2012. I used this for the last twenty years, has been used to make able soft to hold 2000 years and sort date (kept stored on six chars with historical data compatibility)in yymmdd yy=98,99,A0,A1..... B0, B1,B2. Used to make able at the end of eighties an important soft to hold long term plans. I use it since this moment and this goes on naturally and can't changed on my computers and data and can be used till year 2370.

Workaround

To pass : rerun normal mode http://<site>/index.php

When the crash occurs the normal session is starting after running the installer as often needed after trunk update.
