Description
1) Column collapsing is not remembered whenever I change from one page to another.

2) And also have had some problems with their navigators saying "cookies must be on" when they are on, no matter which browser is being used. This happens as they attempt to login. After many tries the user can login.

Using:
Tiki 6.1 fresh code install, on past 6.0 db updated to 6.1.

Importance
9 high
