Description

    tiki-login.php line ~308

    📋

    if ($prefs['limitedGoGroupHome'] == 'n' || $url == $prefs['site_tikiIndex'] || $url_path == $prefs['site_tikiIndex'] || basename($url_path) == $prefs['site_tikiIndex'] || ($anonymous_homepage != '' && ($url == $anonymous_homepage || $url_path == $anonymous_homepage || basename($url_path) == $anonymous_homepage)) || ($tikiIndex_full != '' && basename($url_path) == $tikiIndex_full)) {

    for $prefs'limitedGoGroupHome' == 'y'
    the sefurl will not match

Solution
    when running on $prefs'limitedGoGroupHome' == 'y' one needs to set the anonymous group home
    it is not always obvious how, especially under sefurl

    for me the solution was
    http:/tiki-6.1/Home
    another spicy example: http:Kezd%C5%91lap

    Suggestions:
    - enhance the Hint next to the group home field.
    - add http:/tiki-6.1/Home and http:Kezd%C5%91lap as examples

- if limitedGoGroupHome is set, and the anonymous group home is not set, it may show a warning in the admin area
- in admin/navigation it shall say that the anonymous group home shall be set even if this is close to obvious

Hi Gergely,
could you please describe the problem?
