Description

Saving a wiki page gives a SQL error. It looks like a typo in the WHERE clause.

The query was:

```
SELECT `version` FROM `tiki_history` WHERE 1=1 AND `pageName` = ? AND `lastModif` < ?  
ORDER BY `version` Array
```

Values:

Using the Custom Component JavaScript Class V11
1295471823

The built query was likely:

```
SELECT `version` FROM `tiki_history` WHERE 1=1 AND `pageName` = 'Using the Custom  
Component JavaScript Class V11' AND `lastModif` < '1295471823' ORDER BY `version` Array
```
