

```
<td>The little house<br></td>

</tr>
<tr>
<td>Carol</td>
<td>The big house<br></td>
</tr>
</tbody></table>
```

you see that the attributes are not translated right.

as well there is a problem with a space like "color: blue"

and another addition: doesn't recognise colors in hexadecimal format (#rrggbb)

it happens in version 3.x and as well as in version 6.1 i am testing right now.

Solution

In lines 346/347 of `tikidir/lib/wiki-plugins/wikiplugin_mwtable.php` you have something like:

```
$value = str_replace("'", "", $value);
        $value = str_replace("&quot;", "", $value);
```

add the following line below that:

```
$value = str_replace("\'", "", $value);
```

To fix the space and hexadecimal problem change line 342 from:

```
if (preg_match("#([&quot;)\''\w#;%-
/\.]+)(?=\s|\Z)#", $string, $matches, PREG_OFFSET_CAPTURE, $cur_pos)) {
```

to

```
if (preg_match("#([&quot;)\''\w#;%-
/\.]+)(?=\s|\Z)#", $string, $matches, PREG_OFFSET_CAPTURE, $cur_pos)) {
```

(moved the /s from the second to the first group)

Edit: space problem still not solved
