Description

Three queries fail during the installation of version 6.1 when using Mysql 5.5.9 because the deprecated syntax timestamp(14) has been removed and should now be timestamp.

The queries that fail are the table creation queries for tiki_banning, tiki_friendship_requests, and tiki_users_score.

This is essentially a duplicate of Ticket ID 2213 except to clearly note the solution and that it affects TikiWiki 6.1 and Mysql version 5.5.9.

Solution

Change the table create queries for tiki_banning, tiki_friendship_requests, and tiki_users_score to remove (14) after the timestamp column types.

Workaround

Copy the queries from the error message and manually run them against the database after replacing timestamp(14) with timestamp
