Description

When creating a topic in admin topic (tiki-admin_topics.php) i have 2 fields to fill:

Topic Name

Upload Image

Only name is mandatory and saving is ok.

If i want to edit the created topic to modify it i see a third field appearing: Add Notification Email.

If i save without giving an email i got the following error : Invalid email.

I can't save. Best evasion course is to close or jump back from this page.

I don't recall having set a feature or an option that force emails for topic article notifications.

There is no reason why i should be forced to add an email ONLY on edit (if a feature were set for a mandatory email address) and the error message (if he is linked to a feature) should be more explicit.

Tested on Tiki23 and the issue has been fixed.
