### Description

I'm having trouble with the miniquiz tracker plugin. I followed instruction here:

<http://doc.tiki.org/PluginMiniQuiz>(external link)

The problem is that all the incorrect options are visible but the correct option is blank. Check the bottom of this page for an example:

<http://chrisready.com/learnenglish/330+Most+Common+Verbs>(external link)

In the first question, the blank (which is the correct answer) should say "Chris" and in the second question the blank should say, "taking a quiz."

This person was able to get the miniquiz working.

I'm using Tiki 6.2. I would use the built in "quiz" feature, but it doesn't give immediate feedback to anonymous visitors, while the miniquiz tracker should.

Here's a screenshot of the tracker field setup

Thanks in advanced for any help!
