Description

It is possible to create several galleries in the root gallery of the file gallery.

It is possible move those galleries into sub-galleries and move everything into other sub-galleries.

It is not possible to move nothing back to the root gallery. In the move dropdown menu the "root" (File Galleries) item is not available.

Should not be restricted.

Solution

I think the code is in tiki_file_gallery.tpl around line 106.

```
Something i coun't figure should be adpaped around here or in the built of $all_galleries
```

```
{section name=ix loop=$all_galleries} <option  
value="{ $all_galleries[ix].id} ">{ $all_galleries[ix].label|escape}</option> {/section}
```

Nor can you move to any folder which has a sub-folder.
