Description
in older versions eg. 2.4, it was possible to use wiki page links with ampersands ( & ) and also different color in the link text

for instance: Look & feel gave the link like <a href=./Look_and_feel> look & feel </a> does

or Look and feel gave the link in blue color

Both works with external link syntax Look and feel

most probably it's the same error as describe in bug #3585

if it's helpful: I'm willed to give a bonus to the person who will fix the bug
