Description

Using Plugin Edit to amend a FancyTable in WYSIWYG submitting a change causes all line breaks in the table body to be removed.

The PluginEdit shows the field "Rows separated by >> in the header; for the table body, one row per line. Cells separated by | in both cases."

Creating a working FancyTable with table body rows like this:

```
row 1 cell 1 | row 1 cell 2
```

```
row 2 cell 2 | row 2 cell 2
```

after inserting with the plugin edit tool this changes to:

```
row 1 cell 1 | row 1 cell 2 row 2 cell 2 | row 2 cell 2
```

Solution

Partial solution by mycroft documented here (fails if more than one Pretty Tracker per Wiki page, and perhaps fails completely in Articles):

Features/Usability Forum

Insert above Line 759 of tiki-jquery.js

```
//workaroround for ckEditor
if ((typeof form.content !== 'undefined') && (typeof CKEDITOR !== 'undefined')) {
```

```
form.content.value = form.content.value.replace(/(\r\n|[\r\n])/g, '&#10;');
}
//end workaround
```
