Description

There are a lot of different PIM applications using the iCal format, that Tiki can export.

As example I showed a usecase, where s.b. needed a synchronisation between Tiki and Google calendars, to make Tiki generated events visible in his Google Calendar, to ease the effort of sheduling between Tiki generated events and his personal google events.

I suggest a project for Calendar Synchronisation.

Please see: [Calendar Synchronisation](#)

Solution

Extending Tiki?
