Windows install | Tiki Wiki CMS Groupware :: Development

Windows install

Status

Open

Subject

Windows install

Version

7.x

Category

- Error
- Less than 30-minutes fix

Feature

Installer (profiles, upgrades and server-related issues)

Resolution status

New

Rating

(0)

Description

Using the auto (or manual) installation procedures on a Windows server gives the error:

The directory 'd:\domain\www\tiki\img\wiki/' is not writeable by SYSTEM.

Since two of the slashes in the address are going in the wrong direction, I'm speculating that is the reason for the error.

Solution

Correct the addresses by fixing the slashes.
