### Description

When a registered user tries to edit an existing calendar event, the Edit/Delete page shows up but there is no description that displays on that page nor is there an edit interface where the event can be edited.

I just discovered a workaround for this bug. If you click on preview for that event a description window

displays and edits can be made. This is still a bug since the average user, even though registered, isn't likely to think to do this, which would lead to frustration.
