Description

Hi,

After display of a filtered list :

Various erratics behavior with the "sort" command by clicking a column of the header :

1- on "date" no effect or the list is cleared (after a crash of SQL request : before we had the crash, now it is handled but simply clears the list)

2- on "version" no effect at all.

Others not checked again (had been two years ago), who will repair can checked each column sort behavior...

Solution

- get errors and check syntax, make syntax corrections
- enhance the error handler. Send message "sorry an error occured during sorting data, refer to site admin"
