Description

When editing a new article, the publish date at the bottom defaults to 2000. The month and day are not consistent, but it's always 2000.

I've checked the code. It's using these variables.

```php
$publishDate = date("U");
$cur_time = getdate();
$expireDate = mktime ($cur_time["hours"], $cur_time["minutes"], 0, $cur_time["mon"],
$cur_time["mday"]+365, $cur_time["year"]);
$dc = &$tikilib->get_date_converter($user);
```

I'm running 1.9.1.

Any ideas?

Solution

Works for me - seen that issue!
Probably not cleared template caches after some upgrade!
