Description

Staging & Approval fails if incorrect \$edit_minor parameter type is supplied to the function update_page. This is the case in Tiki 6.3

This causes the whole staging & approval mechanism to fail.

Solution

Fix the type of the \$edit_minor parameter supplied.

So, the result will be like...

```
function update_page($pageName, $edit_data, $edit_comment, $edit_user, $edit_ip,
    $edit_description = , $edit_minor = 0, $lang=, $is_html=null, $hash=null, $saveLastModif=null,
    $wysiwyg=, $wiki_authors_style=) {
    global $smarty, $prefs, $dbTiki, $histlib, $quantifylib;
    include_once ("lib/wiki/histlib.php");
    include_once ("lib/comments/commentslib.php");

    /**
    AB: Fix missing minor_version during staging
    **/

    $edit_minor = intval($edit_minor);

    /** End fix **/
```
