Description

Showing a comment to a blog entry that has been posted the same day, only the time when the comment was posted is displayed. We use the German translation of TikiWiki, but the English "at" in "at 12:34" is display, not the German "um".

After having a look into the code, it seems the translation function is not called in lib/smarty_tiki/tiki_short_datetime.php

Solution

```
delete: return empty($intro)? $time:str_replace(array('on', 'On'), array('at', 'At'), $intro).'.$time;
```

```
insert instead: return empty($intro)? $time: tra(str_replace'on', 'On'), array('at', 'At'), $intro.'.$time;
```

A fix in the official code base would be great.

Thanks!
