### Description

Machine translation ( <http://doc.tiki.org/Machine+Translation> ) seems to be broken in Tiki 6 LTS, at least.

No content is translated from the page.

The same site (before upgrading months ago to tiki6) had that feature working.

Is this feature working for anyone on any stable (non deprecated) tiki version?

--

Update:

I've just checked on localhost with 8.x (r38429), and the feature still exists in admin panels. When enabled, and attempted to request to have a wiki page google-translated, a blank page is shown :-/

### Workaround

closing this item as out of date since Google changed his api, and lph coded something to do a similar thing with bing, as far as I did read long ago in commit log messages. So closing this item.

Louis-Philippe Huberdeau 25 Oct 11 12:40 GMT-0000

This probably cannot be fixed. Google decided to close the translation API a few months back.
