Description

Hi,

After upgrading my web site from tiki 7.0 to 7.2, I've noticed that the "View edit icons" (feature that show/hides the plugin edit icons) button has disappeared.

Regards,
Yannick

Solution

If you hadn't explicitly enabled the "Toggle display of section and plugin edit icons" preference, the upgrade to 7.1 will indeed disable it. This is a voluntary change made in revision 35100.

The feature didn't disappear, you just need to re-enable the preference. What should happen is the "Show edit icons" icon disappears, but edit icons also start always showing.

I added an item on that change to http://tiki.org/ReleaseNotes7.1#Important_Changes
If you really can't re-enable, please reopen the ticket.

Hi Philippe,

I've upgraded again from 7.0 to 7.2.

The "Toggle display of section and plugin edit icons" preference was enabled prior to the upgrade. Apparently the upgrade disabled that preference, and indeed I had to re-enable it.

Thanks for your help.

Unfortunately, due to the 2nd bug I've opened ("Non-parsed wiki feature doesn't work correctly anymore") ("hope" that that one is really a bug), I have to downgrade my website again :-/

Best regards,
Yannick
