Description

After upgrading from 7.1 to 7.2 RSS Feeds not working.

I had a similar error when upgrading from 7.0 to 7.1

There was a bug fix for 7.1 and tried it with 7.2 but it did not work.

I was asked for a log last time, can I have name of log file again and I can enter information here.

Solution

Just reporting that things don't work doesn't work.

This must related to #3950.

Feel free to reopen if you can reproduce with a current version and describe the problem.

The log file depends on your server. Relevant PHP configuration directives include `error_reporting`:
<http://www.php.net/manual/en/errorfunc.configuration.php#ini.error-reporting>

Also try applying the `Debug_Mode_Enabled` profile.
