Description

If a wiki page is RENAMED it no longer appears in the Last Changes list.

I've tested this against our own system <http://thereevesproject.org> running 4.3 (yes I know we need to upgrade) and also against 7.1 running over at opensourcecms.com. Suspect it applies to intervening versions as well.

On 4.3 module `last_modif_pages` does correctly continue to list the renamed page, using its new name. (This aspect not tested on 7.1)
