Description
Themes.tiki.org is OK:
Indexation
wiki page: 214
forum post: 178
blog post: 59
article: 18
file: 80
trackeritem: 28
comment: 35

But the other sites are unable to complete the indexation.

Custom module "Search_tracker_summary" is generating: "Required features: feature_search. If you do
not have the privileges to activate these features, ask the site administrator."

blank page here as well:
