This bug exists as well in Version 9 and Trunk only when you use the WYSIWYG. When the redirect plugin is used in any content area (Blog, Articles, Wiki etc...) in WYSIWYG mode then the plugin gets executed and there is no way to edit that content again.

Pascal St-Jean 13 Apr 12 20:55 GMT-0000

Thank you for submitting this bug, we have also noticed this as described in my previous comment. We have added this to my team's TODO list and will try to get a fix as soon as possible

evliempt 18 Dec 14 13:11 GMT-0000

There is a workaround as solution.

Replace in this example with { }:
GROUP(notgroups=%22Admins%22)
text
redirect page=wikipagename
GROUP

This way admins will not be redirected and can edit the article
