Description
    As reported on the dev mailing list....

    http://thread.gmane.org/gmane.comp.cms.tiki.devel/25682

    Nelson: see comment for fix.

Solution
    Link added for "Rebuilding the preferences search index".

    Please check this commit id: 48339

    @Mani: I can't test but it looks good. Closing wish.

Hi Mani,

The proper way to fix this is not to clear the cache on cache clear, but rather to add an additional link to clear the preferences search index alone when no results are found.

Can you do as follows?
https://www.evernote.com/shard/s37/sh/30aed4fc-6a12-4408-8d9d-2c5b132efb2a/63a2065bfe0b15829b291c94d35142c0

The link should activate something on the tiki-admin.php?page=search page itself to delete the following directory: $prefs'tmpDir' . '/unified-preference-index-' . $prefs'language'

Jonny Bradley 05 Nov 13 10:59 GMT-0000

The link you need already exists - try tiki-admin.php?prefrebuild

I added some code (i can't find now) to cache lib to reindex when all caches were cleared (made sense to me) but LP rolled it back, as it's not a cache which is fair enough. Nelson's suggestion seems fair enough - will talk to Mani...
