Description

Hello.

Today I found an error in "tiki-editpage.php".

The error is on the Line 1092.

Solution

trunk X

```
($tikilib->user_has_perm_on_object($user, $_REQUEST["page"], 'wiki page', 'tiki_p_admin_wiki'))  
{
```

The same line of 9.x branch's file is

branch

```
($tikilib->user_has_perm_on_object($user, $_REQUEST["page"], 'wiki page', 'tiki_p_admin_wiki'))  
{
```

I love Tiki Wiki very much. I believe this is the best Wiki product in the world. So this unbelievable careless miss should be fixed as soon as possible because editing wiki is most important function of this product at all.

Best regard,

bynk

And it will be merged to trunk shortly (if not already)

What is your SourceForge username? It would have been faster to commit a fix than to report the issue

Thanks!
