Description

TikiWiki version 8.4

I attempted to apply the Company Intranet profile and my site (locally hosted) is no longer available.

Fatal error: Cannot redeclare class Zend_Oauth_Consumer in /usr/share/php/libzend-framework-php/Zend/Oauth/Consumer.php on line 279

Here is profile:

http://profiles.tiki.org/Company_Intranet_8x

We don't yet use Oauth in Tiki (although it's part of Zend Framework, and Zend Framework is part of Tiki)

From the path, I suspect your instance is trying to use a Zend Framework installed separately.
`/usr/share/php/libzend-framework-php/Zend/Oauth/Consumer.php`

Did you install Tiki via an installer (ex.: Softaculous), via a package manager? (ex.: apt-get) or manually?

Thanks!
