Description

Was in Tiki 8.x too. Hoped it is fixed in Tiki 9 but it is still there.

## Comments

**Philippe Cloutier** 14 Aug 17 19:44 GMT-0000

Does this persist?

**Torsten Fabricius** 14 Aug 17 19:54 GMT-0000

Nooooo it does NOOOT persist, even with a verrry strange UI and UX

I just checkd on dev, as I worked with the Alias today anyway.

I created one and wanted to delete it, so I ticked only the one to be deleted, but the System deleted all unticked and kept the one ticked I had ticked for deletion!

All Alias Plugins on dev.t.o are gone now!

Torsten

PS: sorry

**luciash d' being**  14 Aug 17 20:18 GMT-0000

No, this has been fixed already. Closing.

**Torsten Fabricius** 14 Aug 17 20:19 GMT-0000

Still very bad UI ... but that is indeed another issue.

**Torsten Fabricius** 14 Aug 17 20:19 GMT-0000

Actually there is no "save" button, but two others seems to exally do the job:

1. enable plugins
2. apply

Both seem to save when existing plugins shall be altered
