Description

When saving a new Wiki page, you get a white Screen of Death.

PHP Fatal error: Call-time pass-by-reference has been removed in ... on line 97

In PHP version 5.4 >

There is no reference sign on a function call - only on function definitions. Function definitions alone are enough to correctly pass the argument by reference. As of PHP 5.3.0, you will get a warning saying that "call-time pass-by-reference" is deprecated when you use & in foo(&\$a);.

For example, use:

```
// Right way!  
function myFunc(&$arg) { }  
myFunc($var);
```

Rather than:

```
// Wrong way!  
function myFunc($arg) { }  
myFunc(&$arg);
```

Solution

Remove the & from line 97 in:

lib\core\Reports\Manager.php

```
public function addToCache(&$watches, $data)
{
    $users = $this->reportsUsers->getAllUsers();
    $this->reportsCache->add($watches, $data, $users);
}
```
