Description
By using i18n "Multilingual" with "Restrict supported languages" and module "switch_lang" in "Admin Modules" the module's drop down menu does not show restricted languages properly. The problem depends on chosen active language.

Restricting to Arabic, English and German, the menu offers correctly three options in Arabic and English, but all languages in German.

Adding French and Spanish to the restricted languages, now there are still three options in Arabic and English (should be five), all options in German and Spanish, and the correct five options in French.

There is no possibility to chose all languages when active language is German or Spanish, so this part of the restriction seems to work properly.

Just clean up "./temp/cache/" in the Admin section "Tiki Cache/System Admin". I suggest to include this hint into the i18n panel.

Marc Laporte 25 Sep 12 21:20 GMT-0000

.. if we can't solve the problem.

Maybe the pref change should force emptying the cache?
