### Description

In Docuwiki there is a floating command bar. It follows the page view. Always in sight, always there with the commands. Easier.

I am not sure how TikiWiki can fit this in, but the "instant readiness" is a plus.

Another nice feature is the display of the icons only - when using the page, but on mouse over the command titles are displayed in a popup.

See: <http://demo.tiki.org/trunk/tiki-index.php?page=For+Arild>
