### Description

On doc.tiki.org/Installation, there is a link to doc.tiki.org/tiki-index.php/page=Installation

16/10/2012 12:16:16 PM

Notice how tiki-index.php/ is added... These links are OK

The screenshot shows the Tiki Wiki CMS installation page at `doc.tiki.org/Installation`. A red box at the top contains the timestamp and a note. Red arrows point from this box to the browser address bar, the 'History' button, and the footer. The page content includes a list of links, contributor information, and a navigation menu.

`doc.tiki.org/tiki-index.php/tiki-pagehistory.php?page=Installation` Powered by Tiki Wiki CMS G

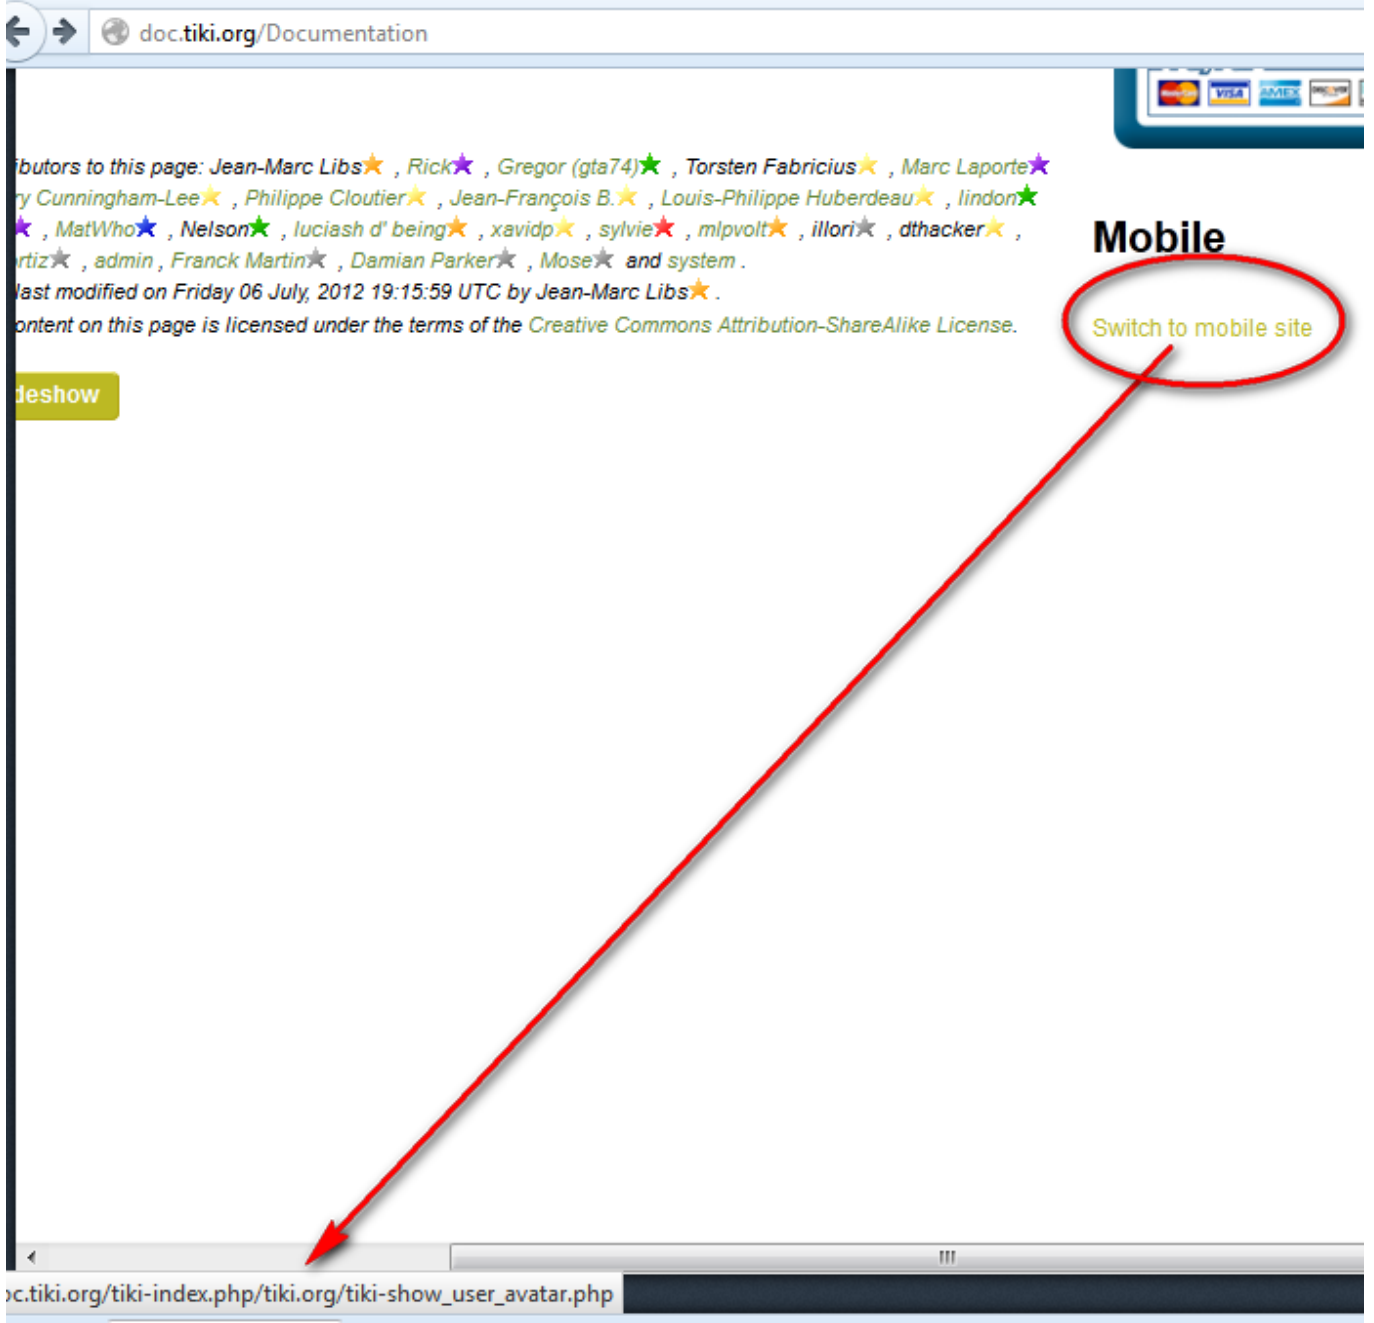

And then, this page is broken, and it has many new links to index, most of which are invalid.

Another example:

22/10/2012 9:30:24 AM

## Mobile module links to a 404 links

### Solution

The cache issue seems to have been solved (not seen the issue in a while) and canonicals avoid the issue being in the search indexes

#### Comments

Marc Laporte 29 Jan 13 11:12 GMT-0000

<http://dev.tiki.org/wish4316/adsf> gives an ugly page

But the canonical is <http://dev.tiki.org/item4316> so it's not such an urgent/critical issue....
