Description
   Mass search and replace (tiki-search_replace.php) indicates as if the replace is successful, but string
   not replaced.

   Matches show the right content. But no replacement is done in the wiki pages even if the message
   reported from tiki is that those pages where updated.

   In my case, I did that to replace:

      theme="start"

   with

      theme="hot-sneaks"

Importance
   5

Priority
   25
