Description

When tiki-view_blog.php?blogId=x lists many posts, each one using footnotes, the footnotes numbers are false except for the first post.

As each post of the list is parsed, its first footnote number is not 1, but the total number of all the footnotes of the preceding posts of the list.

Versions : 6, 9, 10.

See : <http://demo.tiki.org/10x/blog2>

and http://demo.tiki.org/9x/tiki-view_blog.php?blogId=6
