Related-to
    • 🟢 Tracker field type relations: should be viewable and editable

Description
    We have a couple of tracker field type "relations" in a tracker, showing other items from the same tracker, and it displays a search box at the left of the dropdown box.
    when we filter for item which have an apostrophe (single quote: '), the filter doesn't seem to find them. Without apostrophe, it does.
    I.e., imagine that we have these two items (without the star):

    • foo bar
    • foo bar'2 foo bar foo bar

    if we search for "foo", we find just the first one, not the second.

    Apostrophes are very common in Catalan, as they are in French and other languages (in English it can be tested against items with names such as this onem, which has the word "doesn't" in purpose ;-).

Workaround
    Brrr, it seems it works fine in dev.t.o (10.x). So maybe fixed in 10.x but not in 9.x LTS?
