Description

Abbas Mousavi reported:

Hi

I am working on a Persian translation of Tiki for an educational site but the new release (v1.9DR4 - Sirius) has serious problems with Right-To-Left? directional languages, Setting the \$feature_bidi to `rtl` in language files has no effect, Many styles, including simple, don't use \$feature_bidi at all, ./templates/tiki.tpl calls Bidi.css before the style.css, and it will has no effect,

(tiki 1.8.5 has none of them)

Please take a look at the code before releasing 1.9.0 , I will be glad if I can help.

Thanks for your wonderful software
Abbas Mousavi
A right-to-left creature from Iran.

Solution

This seems quite old and probably corrected. Please confirm if issue is still there, otherwise, this will be closed.
