### Description

From [http://irc.tiki.org/irclogger\\_log/tikiwiki?date=2013-05-08,Wed&sel=42#138](http://irc.tiki.org/irclogger_log/tikiwiki?date=2013-05-08,Wed&sel=42#138)

“

- (13:59:23) xavi: in case it's related, we have an issue to see the icon of the pdf file uploaded (icon is not shown)
- (13:59:50) xavi: and when attempting to see the img source, in a url like `dl2&thumbnail=y&x=16` (sef is on), then we see this other messages on a white page:
- (14:01:37) xavi: Strict Standards: Non-static method `Image::is_supported()` should not be called statically in `/path/tiki-download_file.php` on line 253 (& 257)
- (14:01:37) xavi: Strict Standards: Non-static method `ImageAbstract::icon()` should not be called statically in `/path/tiki-download_file.php` on line 278
- (14:01:37) xavi: Strict Standards: `call_user_func()` expects parameter 1 to be a valid callback, non-static method `Image::get_icon_default_format()` should not be called statically in `/path/lib/images/abstract.php` on line 183
- (14:01:37) xavi: Strict Standards: `call_user_func()` expects parameter 1 to be a valid callback, non-static method `Image::is_supported()` should not be called statically in `/path/lib/images/abstract.php` on line 189

That seems to happen only when php is 5.4.x. Downgrading php to 5.3.x seems to be a valid workaround (provided that all caches are cleared, etc)

Good day Xavi,

in your description, you seem to identify how to fix the bug. Would you be able to commit a fix in Trunk?

Xavier de Pedro 20 Nov 13 12:25 GMT-0000

No idea how to fix. In the description I indicated that I chose to downgrade the php version in the server to an earlier version that didn't conflict with that issue.
