### Description

When I enable daily reports and run the cron task,  
I get an error:

Fatal error: Uncaught exception 'Exception' with message  
'There is no class to handle the event wiki\_page\_created.'  
in ./lib/core/Reports/Send/EmailBuilder/Factory.php:24

Stack trace:

1. 0 ./lib/core/Reports/Send/EmailBuilder.php(107):

Reports\_Send\_EmailBuilder\_Factory->build('wiki\_page\_creat...')

1. 1 ./lib/core/Reports/Send/EmailBuilder.php(44):

Reports\_Send\_EmailBuilder->makeEmailBody(Array, Array)

1. 2 ./lib/core/Reports/Send.php(47):

Reports\_Send\_EmailBuilder->emailBody(Array, Array, Array)

1. 3 ./lib/core/Reports/Manager.php(50):

Reports\_Send->sendEmail(Array, Array, Array)

1. 4 ./tiki-user\_reports\_send.php(20):

Reports\_Manager->send()

1. 5 {main}

thrown in ./lib/core/Reports/Send/EmailBuilder/Factory.php on line 24

#### Solution

It appears that the email builder expects, but doesn't find:  
lib/core/Reports/Send/EmailBuilder/WikiPageCreated.php

I copied WikiPageChanged.php and made minimal changes (attached),  
and the next error was about wiki\_page\_deleted,  
so I copied & edited it again (attached), and the errors stopped.

I haven't yet just received Daily Report email to verify that everything works correctly, however.

Good day,

we have committed another patch that you submitted. We were wondering if you would be interested in committing your code directly. We will be more than happy to help you get on your way to committing code into Tiki 😊

<https://dev.tiki.org/How+to+get+commit+access>

Clif Kussmaul 11 Aug 13 03:47 GMT-0000

Yes, I would like to start committing code directly,  
but I am traveling and then classes start,  
so I won't have time for setup until mid-September.  
Thank you for the encouragement!

Pascal St-Jean 11 Aug 13 14:54 GMT-0000

Ok perfect, mid september is perfect timing. Tiki 12 is not being release until later in October  
therefore all your ideas can be put into Tiki 12. Plus Tiki 12 is going to be an LTS so you'll be able  
to run your projects with this version knowing it will be supported for a long time.

thanks
