### Description

**Happens in 9.x and 11.x (so presumably 10.x as well).  
Sometimes, in preview mode, this transparent overlay  
appears, and it's no longer possible to click the actions below.**

To reproduce, do a preview of a document in AJAX (so above) and use the toolbar (ex.: bold)

#### Solution

should be fixed in r48091 in 11.x and r48092 in 9.x

#### Workaround

You can use tabs to get to the save button, but the average user has no chance of figuring that out.

#### Importance

I haven't been able to reproduce this bug on 9.4 or 11.0

I also tried on Mac, Windows and Ubuntu (Firefox, Chrome, IE)

I also tried various things in the page, lenght, plugins etc...

Could you investigate to see what the configuration looks like on the tiki where you found this issue and try to reproduce it on Show.

thanks
