Description

WYSIWYG articles are ok when displayed using tiki-read_article.php, plugin or newsletter but show html on tiki-view_articles.php

Check Article 2 wysiwyg

http://demo.tiki.org/11x/tiki-read_article.php?articleId=4

Now compare : http://demo.tiki.org/11x/tiki-view_articles.php

and also : <http://demo.tiki.org/11x/tiki-index.php>

Hi Bernard,

So I was able to reproduce the bug but this is NOT a WYSIWYG bug. Its actually an issue with the parsing of the article header. I was able to enter HTML in the header and get the issue you had.

This is also a good reason why you should always create a SHOW instance for your bug. I wasn't even able to recreate the WYSIWYG editor in Article Heading like you have on Demo. I have no idea where that setting is in Tiki
