Would it be possible to give more context of the bug and possibly try to reproduce on Show.

This is the commit with related code:

<http://sourceforge.net/p/tikiwiki/code/46546>

I got that error message simply by visiting the URL from the screenshot but it's not there now. Since this a memory related error, it needs a lot of data. I can't realistically reproduce this one on show.

Thanks!

Lets close it for now.
