Description

Not possible to delete tracker 16 here:

<https://next.tiki.org/trackers>

I can't reproduce on show, so it must be something with the data from tiki.org

This is blocking progress on [Unified Search with MySQL Full Text Search](#)

Nelson, just a reminder you had mentioned you would check this out.

Not sure if you can look at the SQL Table to see if the tracker is actually still there.

thanks

Nelson Ko 14 Nov 13 20:03 GMT-0000

Jonny is helping to figure this one out...

Nelson Ko 14 Nov 13 20:26 GMT-0000

Jonny thinks it might be an outdated PHP problem on this machine, will check after the server is upgraded. Checking with Oliver about PHP version.

Marc Laporte 14 Nov 13 21:09 GMT-0000

The requirements from Tiki 11 to Tiki 12 have not changed.

<http://tiki.org/tiki-check.php> reports "PHP version 5.3.10-1ubuntu3.8
You have a recent version of PHP and you can run any supported
versions of Tiki."

Nelson Ko 17 Nov 13 22:23 GMT-0000

now that tiki.org is upgraded to 12.x and next.tiki.org is trunk we have more info. The tracker problems DO NOT exist in tiki.org, but still remain in next.tiki.org. So it is not a 12.x issue but rather something to do with the way next is created or something. Will have to discuss/investigate further with Oliver.

Nelson Ko 04 Aug 14 15:45 GMT-0000

I tried deleting all the tracker items, it seem to be problematic with one item (the TorstenTest one). So I deleted that one singularly. Once that one was gone and all the tracker items gone the Jitsi tracker deletes ok.
