Hey Marc,

I've been editing Tracker Items all week and many of them have JCaptures that you created. I can save and it still works fine.

What happens on your end after you edit? Does the JCapture not display anymore ?

Weird that it doesn't do the same for you...

This reinforces how important show and jCapture are 😃

You can see the problem in action here: http://dev.tiki.org/item4656

The thing is that despite seeing the in the edit pane, and saving, it does not actually break the jcapture at all. The viewing is unaffected.
