This sounds like a caching issue maybe? Or perhaps it's just not checking the recipient's lang pref and using whatever language the site's in currently?

상태: open -> closed

설명:

-기존-:

Dev.t.o has the Syntax highlighter enabled, with theme as: "Off (but switchable)"

I'm editing this page:

<http://dev.tiki.org/tiki-editpage.php?page=Tiki12>

as user xavi, with Chrome, and I can't see the button to switch the highlighter on.

Weird: after a while, the button is shown again.

I can't reproduce it anymore. Who knows... Closing item.

Hey Jonny,

I think this is what you fixed right?
